

Artist Alan Boromeo uses these tools to make components for his sculptures. www.australianironart.com

THE SAFE AND EASY WAY TO ADD METALWORK TO YOUR MEN'S SHED

The Genuine British **metalcraft™**
Range of Tools!

ADD DECORATIVE AND STRUCTURAL
METALWORK TO YOUR PROJECTS WITHOUT
NEEDING PREVIOUS ENGINEERING EXPERIENCE.

- **SAFE** – no heating of the metal or electricity needed.
- **COST EFFECTIVE** – spend less on gas or forging fuel.
- **UNIFORMITY** – results easier and faster to repeat when the steel is not heated.
- **RIVETING** – some projects can be made with no welding when using the riveting feature.
- **WIDELY USED** – by engineering firms, hobbyists, artists schools and colleges.

tools from Britain are a top quality range of hand powered tools for cold forming of steel.

People of all ages can now work with metal more safely and produce projects of professional quality.

- Combine metal with other mediums like timber or ceramics to add new possibilities to projects such as furniture, craft or garden ornaments.
- Fabricate components for other projects.
- Make Gates, Security Grills or Fence Panels. Add some of our accessories to finish off wine racks, candleabras, or party hire items.
- Transfer your ideas into reality.

WITH THESE TOOLS YOU CAN

- ☆ Cut steel accurately to length
 - ☆ Bend and repeat angles
 - ☆ Twist flat and square bar
 - ☆ Form decorative scrolls
 - ☆ Roll circles and curves almost any size
 - ☆ Punch holes and Rivet projects together without welding
- All this is possible at the pull of a handle, without heating the metal!

If you would like to see these tools working we may be able to visit your shed and do a demonstration, or if this is not possible, please contact us for a copy of our DVD and also other products we can supply.

We look forward to hearing from you.

These tools are only available from the
Sole Australian Importer & Distributor:
